**Dragan Z. Milosevic, Peerasit Patanakul, Sabin Srivannaboon : Case Studies in Project, Program, and Organizational Project Management** before purchasing it in order to gage whether or not it would be worth my time, and all praised Case Studies in Project, Program, and Organizational Project Management:

0 of 0 people found the following review helpful. Perfect for Graduate StudiesBy Chilly BillyThis book is perfect for my graduate project management studies. The various case studies throughout offer wonderful lessons-learned, without the painfulness typical of lessons-learned in the usual way.0 of 0 people found the following review helpful.

Five Stars  
By Donald Brown  
as advertised

Major problems with the digital version!  
By E. Huemoeller  
Major problem with the digital version of this book. Many of the paragraphs in the text are truncated and missing letters or words at the end. You can infer some of the content, but not always. This is a critical issue for a book being used for a college class!

The ever expanding market need for information on how to apply project management principles and the PMBOK<sup>®</sup>; contents to day-to-day business situations has been met by our case studies book by Harold Kerzner. That book was a spin-off from and ancillary to his best selling text but has gained a life of its own beyond adopters of that textbook. All indications are that the market is hungry for more cases while our own need to expand the content we control, both in-print and online would benefit from such an expansion of project management "case content". The authors propose to produce a book of cases that compliment Kerzner's book. A book that offers cases beyond the general project management areas and into PMI<sup>®</sup>;s growth areas of program management and organizational project management. The book will be structured to follow the PMBOK in coverage so that it can not only be used to supplement project management courses, but also for self study and training courses for the PMP<sup>®</sup>; Exam. (PMI, PMBOK, PMP, and Project Management Professional are registered marks of the Project Management Institute, Inc.)

From the Back Cover  
Business Economics/Project Management "What makes this book especially appealing as a learning tool is its content organization that allows readers to focus selectively on issues in specific areas, such as the nine knowledge areas of PMI's PMBOK<sup>®</sup>; Guide, or a program life-cycle phase, or best practices related to PMI's OPM3<sup>®</sup>;"  
Hans Thamhain, PMP, PhD Bentley College "This wide-ranging book will serve the needs of its readers in many ways by addressing multiple knowledge areas as well as describing best practices beyond any specific area. Furthermore, it addresses one of the most timely (and least understood) areas in the field—the hierarchical perspective of project, program, and organization."  
Aaron Shenahr, PhD, Rutgers Business School A unique, detailed guide to project management through real-life case studies As the application of project management techniques expands to include day-to-day business operations, students and professionals are recognizing the need to develop the skills necessary to meet this growing trend. To help accelerate and enrich learning of the changes taking place in project management use in business, this valuable reference provides real-world guidance to project managers on the job, and supports college texts covering project management and related areas of study by examining actual case examples from different industries in diverse knowledge areas. This book: Follows the established guidelines set in A Guide to the Project Management Body of Knowledge (PMBOK<sup>®</sup>; Guide)  
Fourth Edition by the Project Management Institute (PMI) Includes exploration of new areas of standard development, such as program management and OPM3<sup>®</sup>; (Organizational Project Management Maturity Model) Case Studies in Project, Program, and Organizational Project Management fills a void in the management field by being the first book of its kind to comprehensively arrange case studies into clearly defined categories to effectively deliver important lessons and concepts from a real-world perspective.  
About the Author  
DRAGAN Z. MILOSEVIC, PhD, PMP, is a retired Professor of Engineering and Technology Management from Portland State University (Oregon). He is a consultant with Rapidinnovation and has worked with companies including Intel, Hewlett-Packard, Boeing, and DaimlerChrysler. He is the author of the Project Management ToolBox (Wiley), which was awarded the 2005 David Cleland Award from PMI. PEERASIT PATANAKUL, PhD, is an Assistant Professor in the School of Technology Management, Stevens Institute of Technology (New Jersey), who has taught and conducted research with several leading companies in the high technology, financial, and telecommunications industries. He has received research grants from NASA and PMI. His works have been published in several international journals and books. Peerasit was a recipient of the prestigious 2007 Transactions Publication Award from IEEE Engineering Management Society. SABIN SRIVANNABOON, PhD, is the Assistant Head of Human Resource Management Program and a faculty member at Sasin GIBA of Chulalongkorn University (Thailand). Prior to joining Sasin, Sabin worked as a program manager for RadiSys and Tektronix, where he was responsible for new product introduction and product redesign projects. Sabin won the 2006 Paper of the Year Award, given by PMI Educational Foundation to recognize excellence in project management research.
