Sue Kenny, Marilyn Taylor : Challenging the third sector: Global prospects for active citizenship before purchasing it in order to gauge whether or not it would be worth my time, and all praised Challenging the third sector: Global prospects for active citizenship:

Written by experts this important book explores the vital relationships between active citizenship, civil society and the third sector in different socio-political contexts. Drawing on a range of theory and empirical studies the book will be a

useful resource for researchers and practitioners.

"Challenging the Third Sector shows great attention to detail, nuance, and context. The authors do not assume that third sector organizations are automatically 'good' for democracy and social justice. They highlight important challenges that organizations face in promoting active citizenship across various locales. . . . [This book] will be a useful resource both theoretically and empirically for readers interested in the pressures of globalization on the third sector and citizens."
