**From Routledge : China and the Global Economy in the 21st Century (Routledge Studies in the Growth Economies of Asia)** before purchasing it in order to gage whether or not it would be worth my time, and all praised China and the Global Economy in the 21st Century (Routledge Studies in the Growth Economies of Asia):

As China continues to ride out the global economic crisis while still retaining year on year GDP growth it is increasingly important to understand how this 'new' economic giant, with its communist-capitalist model operates its economic and business environments. This book is designed to scientifically examine the contextual variables that foster sustainably dynamic economic growth in China. In particular, the contributors provide an incisive analysis of the contextual bases underlying such a dramatic rising economic power and the immense implications for enterprises and countries involved in dealing with China. Drawing on the latest studies and cutting edge research findings, this book analyses FDI, project management, internationalisation, the continued role of state-owned enterprises and doing business in China. As such it will be essential reading for all students of Chinese business and economics, as well as businesses seeking to develop a critical understanding of the driving global economic force which is China.

About the Author John Saeenbsp;is the former Dean of the School of Business Administration and Faculty of Communication Studies at the International University in Germany and the Editor-in-Chief of the Journal of Management Systems.
