5 of 5 people found the following review helpful. Practical guide to understanding other cultureBy Tony BruguierThe book starts slowly and it has some useless information. It basically tries to convince the reader that understanding other cultures is important. Well, if I didn't think so, I wouldn't have bought the book in the first place.Then, there is some generalities about business, wrapped up in a lot of business/MBA BS. But it gets better.Then, they lay out a

method of classifying cultures with several measures that do make sense. Then, there is a quick survey of several cultures. This section is extremely useful. I grew up in France but I have now lived in the US for 6 years. Their analysis is true, but it also puts a structure on the observations I made. Working with Chinese, Japanese, and Korean folks, I agree with their presentation. Form inside or outside a culture, it helps understanding how you react, and how other people react. The book doesn't make value judgments on cultures peculiarities, just gives the information. I would say it's a must read, especially when it is below 20 bucks. Just skip the beginning. 0 of 0 people found the following review helpful. From Library Journal Designed as a training program for those engaged in international business operations and academics, this book addresses the impact of cultural diversity on international business and expresses the necessity for developing "cultural competence" by international business operators. Drawing both from the literature of cross-cultural studies and from the experience of their practice, the authors (who are business consultants) take the fascinating approach of breaking the complexities of cultural differences into value orientations, put in the context of ten variables: environment, time, action, communication, space, power, individualism, competitiveness, structure, and thinking. The resulting framework offers readers systematic guidance on how to put in perspective the many factors and variations of cross-cultural issues. This work, which cites additional useful resources, is recommended for all business collections. Ali D Abdulla, East Carolina Univ., Greenville, N.C. Copyright 1994 Reed Business Information, Inc.
