1 of 1 people found the following review helpful. Not for the Self EmployedBy Andrew ShawNot really aimed at Self Employed people. It's a book for someone who wants to build a profitable business that they can then sell on. If you want to do that then this book is for you. If you are looking for advise in setting up a self employed business that you don't intend to expand or sell. Don't bother.0 of 0 people found the following review helpful. Simply brilliant!By Brian CooneyThis book is excellent and a great buy now for everybody starting or thinking of starting a business. The

Starting point of any great business is getting clarity around the fundamental reasons for its existence and this book cuts right to the heart of the matter enabling you to build yours on solid foundations. 0 of 0 people found the following review helpful. very interesting
By JeanA pertinent read for anyone deciding whether or not entrepreneurship is for them. I helps clarify some greyish areas that surround start up businesses.

This book is full of the kind of information you need to run a small business successfully - whether you are just starting out, or you have an established business and you want to develop it and ensure its survival. Through a series of 'Killer Questions' the authors highlight all the important things you need to think about to make your business a success and ensure you are heading in the right direction. The book is divided into three sections: the first deals with the business owner themselves, the second addresses other people involved in the business, whether they are customers, suppliers, staff or consultants, and the third looks at the structure of and planning in the business. The informal approach and short chapters means that the book can either be read straight through or be dipped in and out of for easy reference. The authors have a combination of fifty years' business experience between them and are both currently involved in business training and coaching.
