wasn't one. But this book had just been published, the only one I found on this topic! It's just what the Dr. Ordered!
I've used its content for more than 20 years! It works! It also supports one of Dr. Deming's 14 points to drive out fear to transform and lead.

By S. McIntyre
This book is on a subject that isn't discussed openly, the use of fear as a motivational tool. It is a shame that the book is out of print, it should be required reading for all managers and CEO's. Using fear to motivate people is counterproductive, it ends up costing much more in loss of creativity, dissatisfaction, and productivity. A great intro to a taboo subject.

By Marty Kramer
I would recommend this not only to the leadership in all workplaces, but also all institutions of learning.
For those of you in leadership positions this can be used in High Power team building and collaborated with the workforce.

Restore Creativity and Trust to Your Workplace
Much has changed since Driving Fear Out of the Workplace first made the undiscussable discussable back in 1991. Advances in technology, new employee/employer relations, and the corporate push to optimize intellectual capital have introduced a host of new workplace anxieties that, left unaddressed, can seriously inhibit individual performance and cripple a company's ability to compete. Which is why, in this revised edition, authors Ryan and Oestreich revisit their original, best-selling work to confront the fears that permeate today's organizations--so that they can become the high-trust, high-performance organizations of tomorrow. This insightful book digs deeply into the root causes of fear and the pervasive 'flu of mistrust' that weakens motivation and commitment. --Terrence E. Deal and M. K. Key, authors of Corporate Celebration: Play, Purpose, and Passion at Work
You'll discover: * How fear prevents people from doing their best * How fear operates in organizations
How to build business relationships without fear...and much more! This work is a timely antidote to the insecurities of workers faced with the pervasive push toward leaner, meaner organizations.
