Marko Dimitrijevic : Frontier Investor: How to Prosper in the Next Emerging Markets (Columbia Business School Publishing) before purchasing it in order to gage whether or not it would be worth my time, and all praised Frontier Investor: How to Prosper in the Next Emerging Markets (Columbia Business School Publishing):

3 of 3 people found the following review helpful. A must read for any modern investorBy D. RippockA great playbook for participating in the growth markets of the future, and a thoroughly enjoyable read throughout.Aside from

actually spending time on the ground in these frontier markets yourself, the only way to truly appreciate their potential and the massive changes taking place there are through the eyes and experience of someone who has. This book details those journeys and experiences with a rare combination of insight and tangible examples to give the reader a unique perspective into why these markets are important for every investor and follower of financial markets to pay attention to for decades to come. Highly recommend this book.

2 of 2 people found the following review helpful. Hard facts for new markets
By Amy Niermeyer I have heard of all the investors making money on all these new foreign markets (like China or Vietnam or else where in Asia). While I've been interested I never knew how to approach it. I read some of the Jim Rogers books and they were ok (fun travel stories). I think I liked this even more; it gave me some really good hard facts to show how new markets can out perform the US/Europe markets I'm familiar with. And I found his case studies really made it easier to follow.

1 of 1 people found the following review helpful. Serious topic AND fun to read
By Cindy D. Every time I hear about (or see the country name on a product label) some new hot country I wonder how I could invest in these new markets. This book makes me feel pretty confident that others (including me) can indeed share in the growth of some of these new countries. I found this book very easy to pay attention to and understand. I never got bored (which happens often in investing books). The content is serious but is presented more in the form of stories and vignettes and examples. This kept my attention and I learned a lot. I would love to visit some of these "frontier markets"; not as a leisure tourist but following the author's approach to get on the ground and see what is going on.

Frontier markets account for 15 percent of global GDP, yet global investors largely ignore them. Fueled by access to technology and information, these markets are emerging even faster than their predecessors, making them an essential component of a globally diversified portfolio. In *Frontier Investor*, Marko Dimitrijevic makes the case for their inclusion, arguing through a diverse set of case studies that it is possible if not wise to make informed investing decisions about these unfamiliar and undervalued markets. Markets that were considered exotic two decades ago—China, India, South Africa, and Russia—are today's mainstream. Dimitrijevic begins with an analysis of how this came to be and looks at the markets that are poised to follow a similar path. He then details a strategy for how and where to invest directly or indirectly for those with limited access but who still wish to profit from emerging market growth. Dimitrijevic covers the political and other risks of taking advantage of these opportunities and the megatrends that may provide new options and open up new countries, such as Cuba and Iran, to exponential growth.

Frontier Investor is terrific. This book is great for anyone interested in investing in the next frontier. It is also excellent for those who want to understand the growth potential and human consequences for these many diverse countries and their people. It is really brilliant and a tour de force. (Michael Spence, winner of the 2001 Nobel Prize in Economics) A must-read for cutting-edge investors. (Marek Belka, president of the National Bank of Poland and former prime minister of Poland) A brilliant and entertaining book that teaches the why, how, and where to invest in the new emerging markets. Dimitrijevic is the grand master of frontier markets investing. Read this book. (Tony Robbins, best-selling author of *Money*, *Master the Game: 7 Simple Steps to Financial Freedom*) A fascinating primer for the investor, businessman, diplomat, or anyone else with an interest or duty to perform in the world's rapidly emerging 'frontier' nations and markets. Dimitrijevic's message, deftly delivered through a combination of insightful statistics, entertaining vignettes, and hard-won personal experience, comes through clearly: 'Do your homework and think broadly to understand the forces at play.' A must-read guidebook to the world's changing economic landscape. (General Stanley McChrystal, (ret.), former commander, Joint Special Operations Command, and senior fellow, Yale University's Jackson Institute for Global Affairs) Marko Dimitrijevic writes about a fascinating topic with the depth that only someone who has done it for years can have. *Frontier Investor* tells stories of success and failure—much of it poorly appreciated, all of it insightful. Pick it up and read it. (Arminio Fraga, former president, Central Bank of Brazil and founder, Gaucha Investimentos) An inspiring point of view. Dimitrijevic's experiences across Europe, Asia, and Latin America make him ideally suited to tackle the investment challenges of this rapidly changing world. (Aleksander Kwasniewski, former president of Poland) Dimitrijevic presents a solid, practical, and trustworthy guide for those interested in the wide range of opportunities frontier markets, such as Colombia, have to offer. (Ivar Uribe, former president of Colombia) *Frontier Investor* is a well-researched book, complete with detailed examples. It belongs in the library of every global investor. (Reading the Markets) Dimitrijevic skillfully argues that lucrative opportunities do indeed exist in many so-called risky frontier markets... (Emerging Market News) [Marko Dimitrijevic] makes the case that frontier markets, which account for 19 percent of the world's GDP, are essential to a globally diversified portfolio. (Worth) Informative and engaging. The author intersperses the narrative with case studies rich in anecdotes that reinforce critical concepts. (Financial Analyst Journal) About the Author Marko Dimitrijevi is one of the world's foremost emerging markets experts, with over 35 years of professional investing experience. A pioneer in conducting on-the-ground due diligence, Mr. Dimitrijevi, CFA has traveled to more than 100 countries. He has invested in over 120 emerging or frontier markets, and was one of the earliest Western investors in China, Russia, Indonesia, Bangladesh, and Saudi Arabia. Currently chairman of investment group Volta Global, from 1995 to 2015

he managed one of the world's best performing emerging markets funds. He has won numerous awards including "Top 25 Mid-Size Hedge Funds" by Bloomberg in 2014, "Top 100 Hedge Funds" by Barron's in 2011, "Top 10 EM Hedge Funds" by Bloomberg in 2010, and "Global Macro Fund of the Year" by Absolute Return magazine in 2007. He has been featured in the world's most respected financial and business publications including Barron's, Bloomberg, The Economist, Financial Times, Forbes, Institutional Investor, Reuters, Time, Wall Street Journal, Washington Post, and Worth, and he is featured in the books *Inside the House of Money* and *Investing with the Hedge Fund Giants*. Mr. Dimitrijevi holds an MBA degree from the Stanford Graduate School of Business, where he was an Arjay Miller Scholar. He is a graduate of the University of Lausanne, Switzerland and holds the Chartered Financial Analyst designation. He and his family live in Miami, Florida.
