Not impressed...By D_FieldsI was eagerly awaiting my order of this book, as I am applying to PhD programs in the fall and have long been searching for an effective way to vamp up my CV. This book is pretty much useless. It didn't tell me anything I didn't already know, except for maybe one thing that I'm not even sure is that useful. All it has is "exercises" that are pretty much useless, too. How the hell is writing how I'm feeling about writing my CV going to make it better? All of the directions are incredibly vague and the samples are lacking. Actually, I feel like the samples are more in the lines of piss-poor. I have found better samples on the internet. Do yourself a favor and spend a little more on a better book.0 of 0 people found the following review helpful. Three StarsBy Maria Sok - but not great, especially if you are looking to apply for a professor position at a university0 of 0 people found the following review helpful. Go deeper than a ResumeBy Soon2bdoctaThis is an excellent for those like

me who are seeking to heighten the awareness of employers particularly in education. As a doctoral student seeking to teach at the college level, this text is second to none. Moreover, it helps one to dig deeper into describing their passion like no resume could ever do. The authors appear to make plain the process of writing a vitae with some examples. Although I would have liked examples more closely related to education, it is a text that is well worth the read and I plan to put it to good use.
