**Patric Deaton : How To Trade** before purchasing it in order to gage whether or not it would be worth my time, and all praised How To Trade:

2 of 2 people found the following review helpful. Don't waste your time...By S. Sanders Don't waste your time or money on this book. All he does is pitch his mentor program. He gives you just enough free stuff to make your mouth water but to truly learn his system you will need to use a particular online trading service. You can download his "\$1,997" software for free but it will only work if you're a member of tradestation.com. Bottom line, if you join his expensive mentor program then I have no doubt his system will work. Otherwise don't waste your time with this book. It is like one of those 30 minute videos pitching a newsletter, but takes longer than 30 minutes to read. The link to his

web page is peppered throughout the book at least 50 times. Don't waste your time. Or money. Buy a Warren Buffet book instead. 1 of 2 people found the following review helpful. Surprised me and learned a lot  
By Laura Betterly  
I picked How to Trade because it looked a little smaller and more manageable than a lot of books I've seen that look like they would make great doorstops. I'm a new trader and I wanted to get a feel for what trading is all about. By page 26 I learned more than I ever expected about how and why we are lied to all the time in the media by the experts, which I always suspected but never could exactly figure out. The whole last part of the book had myth after myth debunked about trading, the markets, and investing. This is stuff I've been hearing my whole life, and guess what---most of it is dead wrong. This explains why so many people lose on such a consistent basis. There were a few annoying typos here and there, like EFT instead of ETF, and I wish the book was a little longer and got into more specifics and tools, but overall, quite a lot of info, very condensed and very good, by someone who at least comes off like a real trader who has been there. Pretty hard to go wrong for 10 bucks in my opinion.

self absorption  
By jim  
This is strictly about promoting his courses. I was shocked after reading the text how so many people rated this promotion book highly. I guess the readers were uneducated in what to look for in decent texts.

Let me explain how you can take minimal risk, spend only a few minutes a day and still bank more profits than most professional stock brokers (and certainly more than when you let someone else manage your account).  
Hello; my name is Patric Deaton and I'm a full time trader. I've learned a lot in my many years in the markets and want to give you some of that knowledge. I've written this book to introduce more people to the idea that they can take control of their own financial future. You will notice I pull no punches. Some say I am blunt, but the truth is just call it the way I see it so I can sleep at night. I don't like financial advisors who charge you 1-2% management fees while losing your money. I don't like the hype "trading gurus" that run infomercials and spam your email box. If anyone could make 50% per month like they claim they would be running the largest Hedge Fund on the planet and making billions in performance fees, not teaching. Our low risk 10 minute per night system usually makes a few percent per month (unless you learn our option strategies which increase your potential exponentially) which can equal over 5-6% per month with compounding. As you will learn, the keyword is low risk. Having a low risk system is the ONLY WAY to have long term compounding work for you. I want to show you that no matter what the over-all economy is doing, you can enjoy more freedom now and retire securely when you choose, not when the government tells you you're entitled to and then only at poverty level social security check. If you're the kind of person who enjoys the freedom that comes from taking responsibility for his own finances, or even if you'd like to, but aren't sure that you're capable, please join me as I explain what's involved, who the players are and how you can seize the wheel and guide your own economic ship safely and confidently. I know, once you've read this book, you'll be ready to set sail on one of the most exciting and lucrative adventures you've ever dreamed of.  
Helping You Retire On Time,
