**From Routledge : Industrial Training and Technological Innovation: A Comparative and Historical Study (Routledge Library Editions: Japan)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Industrial Training and Technological Innovation: A Comparative and Historical Study (Routledge Library Editions: Japan):

Taking an international and comparative perspective, this book focuses on the relationship between industrial training and technological change in three major global economies ndash; the UK, USA and Japan. The contributors, an

international group of leading researchers, look at the origins and development of training in these countries, and analyse the benefits resulting from the interaction of a skilled workforce and technological change. This analysis of training in major industrial nations reveals the full complexity of the relationship between labour and technological change. It shows the value of an approach which is both historical and comparative, and highlights the importance of education and training as a necessary basis for successful innovation.
