From Palgrave Macmillan : Inequalities During and After Transition in Central and Eastern Europe (Studies in Economic Transition) before purchasing it in order to gage whether or not it would be worth my time, and all praised Inequalities During and After Transition in Central and Eastern Europe (Studies in Economic Transition):

The book deals with the key aspects of social and economic inequalities developed during the transition of the formerly planned European economies. Particular emphasis is given to the latest years available in order to consider the effects of the global crisis started in 2008-2009.

“A welcome addition to the ongoing discussion, since it focuses on a region where inequality is often assumed to be a less pressing issue due to the common state socialist past. . . . The way the volume is structured around the theoretical framework and its comparative nature makes it a good choice for readers both in academia and in policy making who wish to familiarise themselves with the region and expand their knowledge on how different institutional set-ups influence inequality.” (Aacute;kos Maacute;teacute;, *Europe-Asia Studies*, Vol. 68 (7), 2016)About the AuthorCristiano Perugini is Associate Professor in Political Economy and J. Monnet Professor of European Integration Studies at the University of Perugia, Italy. He is Research Associate at Fren, Belgrade. His interests lie in income and wage inequality, labour markets and transition economies. He has published his works in *The of Income and Wealth*, *Economic Systems*, *Economics of Transition* and the *Cambridge Journal of Economics*, among others.Fabrizio Pompei is Assistant Professor in Political Economy at the University of Perugia, Italy. His main research interests are focused on the relationships between labour, productivity and innovation, and their effects on wage inequalities in a comparative perspective. On these topics he has published extensively in international journals including *International Labour*, *Cambridge Journal of Economics*, *Energy Economics* and *International of Applied Economics*
