Michael Beggs : Inflation and the Making of Australian Macroeconomic Policy, 1945ndash;85 before purchasing it in order to gage whether or not it would be worth my time, and all praised Inflation and the Making of Australian Macroeconomic Policy, 1945ndash;85:

In the decades after World War II, inflation undermined the aspiration for full employment in Australia. This book tells the story of how the Australian state was shaped by the confrontation with monetary instability: a pre-history of neoliberalism.

ldquo;This is a scholarly and in many respects impressive book, derived from the author's doctoral thesis. hellip; Read as a set of essays on the relationship between contemporary economic ideas and macroeconomic policy-making in Australia between the 1940s and the 1980s, this book makes a strong contribution to historical literature.rdquo; (John Singleton, *Australian Historical Studies*, Vol. 48 (1), February, 2017)About the AuthorMichael Beggs is a Lecturer in Political Economy at the University of Sydney, Australia, where he works on the history of monetary thought and policy.
