Jonatan Pinkse, Ans Kolk : International Business and Global Climate Change before purchasing it in order to gauge whether or not it would be worth my time, and all praised International Business and Global Climate Change:

Climate change has become an important topic on the business agenda with strong pressure being placed on companies to respond and contribute to finding solutions to this urgent problem. This text provides a comprehensive analysis of international business responses to global climate change and climate change policy. Embedded in relevant

management literature, this book gives a concise treatment of developments in policy and business activity on global, regional and national levels, using examples and systematic data from a large number of international companies. The first part outlines the international climate policy landscape and voluntary initiatives taken by companies, both alone and together with others. The second part examines companies' strategies, covering innovation for climate change, as well as compensation via emissions trading and carbon offsetting. Written by well-known experts in the field, *International Business and Global Climate Change* illustrates how an environmental topic becomes strategically important in a mainstream sense, affecting corporate decision-making, business processes, products, reputation, advertising, communication, accounting and finance. This is a must-read for academics as well as practitioners concerned with this issue.

'The book is generally well-written and very clearly organized, and it is the product of years of engagement by the authors with the topic of climate change and corporate social responsibility.' - *Journal of International Business Studies* 'Although this topic is of vital importance to business, as well as to society, the authors make no attempt to sound alarms; they simply provide the results of intensive research in the matter of business reactions to global climate change. Readers wishing to further investigate the topic will find the comprehensive list of references helpful.' - W.C. Struning, Seton Hall University, USA; *CHOICE* (Sept 2009, Vol. 47) 'Ans Kolk and Jonatan Pinkse are the world's leading thinkers on the interface between international business and global climate change. This well-written book will greatly benefit any scholar or manager looking for state-of-the-art knowledge on corporate responses to the defining environmental challenge of our generation.' - Alain Verbeke, University of Calgary, USA 'This timely andnbsp;comprehensive book isnbsp;an excellent contribution tonbsp;contemporary management studies. It is highly relevant to managers, scholars and studentsnbsp;in strategic management and global governance, two fields in whichnbsp;globalisation is leading tonbsp;such intensenbsp;innovationnbsp;that thenbsp;basics of our currentnbsp;frameworks are being seriously tested. This publication is a "must-read" also for policy-makers and civil society leaders who want a betternbsp;understanding ofnbsp;regulatory, co-regulatory and self-regulatory policy instruments and processes that address the key challenges of climate change.' - Gilbert Lenssen, European Academy of Business in Society 'Climate change is the single most important strategic issue facing business in the next fifty years. This book provides a comprehensive examination of the strategic options facing businesses as they struggle to cope with the sweeping competitive and regulatory challenges that climate change presents to various sectors. The authors draw from their rich scholarly knowledge of business and climate change to craft a very accessible and relevant portrayal of key aspects of emissions management, carbon trading, and innovation strategies.'nbsp;-nbsp;David Levy, University of Massachusetts, Boston, USA 'Ans Kolk and Jonatan Pinkse are the world's leading thinkers on the interface between international business and global climate change. This well-written book will greatly benefit any scholar or manager looking for state-of-the-art knowledge on corporate responses to the defining environmental challenge of our generation.' -nbsp;Alain Verbeke, University of Calgary, Canada
