**From Physica : International Economics of Resource Efficiency: Eco-Innovation Policies for a Green Economy** before purchasing it in order to gage whether or not it would be worth my time, and all praised International Economics of Resource Efficiency: Eco-Innovation Policies for a Green Economy:

Human societies face a threatening future of resource scarcity and environmental damages. This book addresses the

challenge of turning these risks into opportunities and policies. It is a collection of high level contributions from experts of sustainable growth and sustainable resource management. Focussing on economics, sustainability, technology and policy, the book highlights system innovation, leapfrogging strategies of emerging economies, possible rebound effects and international market development. It puts natural resources centre stage and will make an important contribution to achieving the goal of a 21st century Green Economy.
