Timothy Forsyth : International Investment and Climate Change: Energy Technologies for Developing Countries before purchasing it in order to gage whether or not it would be worth my time, and all praised International Investment and Climate Change: Energy Technologies for Developing Countries:

This study, based on fieldwork and case studies of southeast Asian countries shows how privatization, investment and new energy technologies can be integrated to combat climate change and provide the maximum return for investors.

The author explains what incentives and regulatory structures are needed that do not damage local competitiveness. Asserting that technology transfer is fundamental to effective policies for climate change and for economic development, the text examines how the benefits can be maximized.

About the Author Tim Forsyth is Fellow in Environment and Development at the Institute of Development Studies, Falmer, Sussex. Previously he was Research Fellow in the Energy and Environmental Programme at the Royal Institute of International Affairs.
