This is a very interesting and informative book.

David Mulford has witnessed and participated in dramatic changes in the world economic system; from newly independent countries in Africa and the emerging Eurobond market to the boardrooms of New York, from the Saudi Arabian Monetary Agency to the White House and Treasury Department, and from the halls of Oxford to the developing expanse of India. In *Packing for India*, Mulford explores the underpinnings, vulnerabilities, and great promise of a global economy that through the spread of capital, products, people, and technology has transformed economic realities and aspirations around the world. *Packing for India* is also a deeply personal memoir of experience and transformation, a firsthand account of key events, and a reflection on world leaders and on the United States' role in international finance. At each stage of his career, Mulford faced radically different challenges, which prepared him to serve successfully as U.S. ambassador to India. How, he is asked by many people, did a person from humble beginnings do so many fascinating things? Mulford answers this question by examining where he has been and what he has learned, and he leaves the reader with his vision for a path toward sustained global growth and stability.

"David Mulford takes us on a fascinating and personal journey through momentous world events and shifts in global finance. Read, learn, and enjoy."
—George P. Shultz, former U.S. secretary of state
