(Pergamon policy studies on the Soviet Union and Eastern Europe):

Partners in East-West Economic Relations: The Determinants of Choice covers the proceedings of an international conference of the same name held at Montebello, Quebec on April 26-29, 1978. This conference brings together various professionals to address contemporary international economic relations issues. One of the three major issues tackled in this compilation is the reintegration of the economics of the Soviet Union and Eastern Europe into the international division of labor. This compendium also studies the determinants of the choice of partners in East-West relations at the national and subnational levels. The last major topic concerned in this selection is the similarities and differences between partnerships in the East-West and North-South contexts. This compendium will be of interest to those interested in economics and related disciplines.
