Patria de Lancer Julnes, Marc Holzer : Performance Measurement: Building Theory, Improving Practice: Building Theory, Improving Practice (ASPA Classics (Hardcover)) before purchasing it in order to gage whether or not it would be worth my time, and all praised Performance Measurement: Building Theory, Improving Practice: Building Theory, Improving Practice (ASPA Classics (Hardcover)):

0 of 0 people found the following review helpful. Gorgeous shape for a "used" text book. By Leslie A Griffin I was just thrilled to find this book, which is a required text for a class, at such a fantastic price. I was expecting some marks or side notes but the book was pretty much in pristine, new condition (except maybe it might have come originally with a

dust jacket but I tend to discard those anyway). This was one of the nicest, newest looking "used" textbooks I have ever purchased. Of course, Murphy's Law struck and the very same night my book arrived, our puppy decided to sneak into our office, where he proceeded to eat the cover off of it, since I had it sitting so nicely on my desk where I thought it would be safe. I can now say two things- 1: This book arrived in FANTASTIC shape, and quickly, too. 2: Now that I am in Grad school, I can finally say that my dog ate my homework. 0 of 0 people found the following review helpful. Good text By shopnshe1 This is a very well composed textbook. Easy to read, clean writing and editing. This book is the required text for a financial management course in a criminal justice masters degree, so I am not a financial management student. I think this is about as interesting as you can make this material.

This volume in the "ASPA Classics" series compiles the most influential contributions to the theory and practice of performance measurement that have been published in various journals affiliated with the American Society for Public Administration. The book includes major sections of original text along with the readings, and provides students and practitioners with a handy reference source for theory development and practice improvement in performance measurement. The coverage is broad, including methods and techniques for developing effective performance measurement systems, building performance-based management systems, and sustaining performance-based budgeting. The articles are all classics in the field that have endured the test of time and are considered 'must reads' on performance measurement.
