From Psychology Press : Processes of Community Change and Social Action (Claremont Symposium on Applied Social Psychology Series) before purchasing it in order to gage whether or not it would be worth my time, and all praised Processes of Community Change and Social Action (Claremont Symposium on Applied Social Psychology Series):

This volume--an outgrowth of the annual meeting of the Claremont Symposium on Applied Social Psychology--focuses on examples of social change and community action, and the processes at work in creating change. The presenters engaged each other and the audience in thinking about how best to create and sustain social change. This volume represents a product of their cumulative insight, research results, and perspectives, including chapters from each of the symposium presenters, as well as a few selected chapters from other noted scholars. Taken as a whole, the volume is highly accessible and presents findings from provocative and programmatic research that offer illuminating lessons for anyone interested in attempts at community change, civic participation, and social action. Processes of Community Change and Social Action provides cutting-edge and complementary approaches to understanding the causes and effects of broad civic participation. The contributors to this volume are all distinguished researchers and theorists, well known for their work on different aspects of processes of community change and social action. They address topics related to service learning, social movements, political socialization, civil society, and especially volunteerism. This unique interdisciplinary collection appeals to social, personality, community, and developmental psychologists, sociologists, and public health researchers. It also should be of considerable interest to practitioners of social action and individuals working to create social change.
