Jeffrey A. Hirsch : Super Boom: Why the Dow Jones Will Hit 38,820 and How You Can Profit From It before purchasing it in order to gauge whether or not it would be worth my time, and all praised Super Boom: Why the Dow Jones Will Hit 38,820 and How You Can Profit From It:

1 of 1 people found the following review helpful. Read Whole Book in 6 Hours! By ValerieHistory as proof and logical explanations make Hirsch very reliable in his prediction. If you're an experienced trader or are just starting out, you will find this book very helpful. I picked up this book thinking i'd have a rough time following because i'm

horrible with my knowledge on history and I felt like I would have got lost among all trading terms, but Hirsch made it easy enough. I really appreciated his insight on past wars and politics. Not only have I gained education from this book, but i've been inspired. 1 of 1 people found the following review helpful. An eyeopener By Terry Steffen At first blush this looks like another outlandish prediction for the purpose of selling a book. The author does an excellent job of laying out the case for his forecast. You soon realize it is not at all unrealistic. I appreciated the opportunity to stretch my thinking beyond the here and now. I've always enjoyed the work of the Hirsch family and this was no exception. 1 of 1 people found the following review helpful. Must Read! By Gregory Outstanding read for the investor looking for long term market trends. Jeffrey Hirsch is a master analysis who debunks Harry Dent's theory of discretionary spending tied to age who's theory has not stood the test of time. If you're looking for that next 1984-2000 huge leg up in the market take the few hours to read this book.

Prosper from the profitable opportunities of the next financial market super boom In 1976, Yale Hirsch predicted a fifteen-year super boom; a move in the stock market of 500% or more. His forecast proved accurate as the market rose and continued upward, eventually posting growth over 1,000% just before the tech crash in 2000. In Super Boom, Jeffrey Hirsch, President of the Hirsch Organization and Editor in Chief of the Stock Trader's Almanac, unveils the next market expansion. Building on his father's research from 1976, Hirsch has discovered that meteoric rises in stock indices are due to specific catalysts predominantly outside of the financial markets. History has a way of repeating itself, especially in the financial markets. The American economy, and subsequently the world economy, has always existed in a cycle of boom and bust: gold, grain, oil, technology, and most recently, real estate, have all bubbled and popped. The key to investing profitably is spotting macroeconomic historical trends and positioning to reap the benefits. Step-by-step, Hirsch puts together the pieces of this puzzle by revealing the central drivers of a super boom. Examines how new cultural paradigm-shifting technologies, as well as peace between major wars, could fuel a super boom Discusses how the massive injection of money by the government, in response to the global financial crisis and the Great Recession, as well as wartime spending, will eventually create an inflationary environment The data and research found here is based on historical information and the boom-and-bust cycle of the past century As markets and economies struggle over the next several years, remember to keep your eye on the future and get ready for the coming super boom and the next 500% move in the market. With this book as your guide, you'll benefit from the insights that only Jeffrey Hirsch can provide.

From the Inside Flap In 1976, Yale Hirsch predicted a fifteen-year super boom; a move in the stock market of 500% or more. His forecast proved accurate as the market rose and continued upward, eventually posting growth over 1,000% just before the tech crash in 2000. History has a way of repeating itself, especially in the financial markets. The American economy, and subsequently the world economy, has always existed in a cycle of boom and bust: gold, grain, oil, technology, and most recently, real estate, have all bubbled and popped. The key to investing profitably is spotting macroeconomic historical trends and positioning to reap the benefits. In Super Boom, Jeffrey Hirsch, President of the Hirsch Organization and Editor in Chief of the Stock Trader's Almanac, unveils the next market expansion. Building on his father's research from 1976, Hirsch has discovered that meteoric rises in stock indices are due to specific catalysts predominantly outside of the financial markets. Step-by-step, Hirsch puts together the pieces of this puzzle by revealing the central drivers of a super boom, namely: Inflation; while it may be at bay for the time being, the massive injection of money by the government, in response to the global financial crisis and the Great Recession, as well as wartime spending, will eventually create an inflationary environment Peace between major wars; despite continuing violence in Iraq and Afghanistan, U.S. troop withdrawals remain on schedule, and military presence in these countries will be winding down over the next several years New enabling technologies; while no one can say for sure where the next cultural paradigm-shifting technologies will come from, energy technology and/or biotechnology could lead the way As markets and economies struggle over the next several years, remember to keep your eye on the future and get ready for the coming super boom and the next 500% move in the market. With this book as your guide, you'll benefit from the insights that only Jeffrey Hirsch can provide and be in the best position possible to prosper from the profitable opportunities that lie ahead. From the Back Cover SUPER BOOM "Jeff Hirsch delivers a 500% effort in Super Boom. Unless you're closed minded or comatose, there is a lot, lot more here than any investment reader can normally hope for. The visuals and data alone are worth many times the price." —KEN FISHER, founder and CEO, Fisher Investments, Forbes "Portfolio Strategy" columnist, five-time New York Times bestselling author "Super Boom reminds the reader of the power of compounding. DJIA 38,820 by 2025 might sound like an outrageous level, but the implied sub-9% compound annual growth rate (following a decade of decline) makes the target appear more attainable. Within these pages, Jeff demonstrates that he has learned a lot from his father and has inherited the reputation as a renowned and respected market historian." —SAM STOVALL, Chief Investment Strategist, Standard Poor's Equity Research "As a kid I taught Jeff how to catch big rainbow trout in Montana. In Super Boom, he's returned the favor by showing us how to catch a monster stock market move. A must-read book." —LARRY WILLIAMS, trader About the Author Jeffrey

A. Hirsch is the President of the Hirsch Organization and Editor in Chief of the Stock Trader's Almanac. He worked with founder Yale Hirsch for fifteen years, taking over in 2001. He appears frequently on CNBC, CNN, Bloomberg, Fox Business, and many other national and international media outlets to discuss market cycles, seasonality, trading patterns, predictions, and historical trends. Hirsch also edits the firm's digital toolkit, Almanac Investor, a subscription-based product including investor alerts, market data, and research tools.
