From Palgrave Macmillan : Sustainable Industrialization in Africa: Towards a New Development Agenda before purchasing it in order to gauge whether or not it would be worth my time, and all praised Sustainable Industrialization in Africa: Towards a New Development Agenda:

Sustainable Industrialization in Africa explores the issues that confront development policy in the context of the MDGs and the post-2015 development agenda from an African perspective. The book argues that development is an ultimate outcome of sustainable, equitable industrialization, and that any development agenda for the future has to ensure that industrialization is fostered in a way that makes economies independent and responsive to the needs of all citizens. Future challenges for sustainable industrialization in Africa, based upon the differences in its current industrialization trajectories, are discussed to ensure that industrial growth results in positive economic and social outcomes in the context of the post-2015 development agenda.

About the Author Padmashree Gehl Sampath is Chief of the Technology and Innovation Report Series Taskforce at the United Nations Conference on Trade and Development (UNCTAD) in Geneva, Switzerland.
