Jason Schwarz : The Alpha Hunter: Profiting from Option LEAPS before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Alpha Hunter: Profiting from Option LEAPS:

1 of 1 people found the following review helpful. Standing at the year of 2015 and look back By helen666I bought and read the book back in 2010, now it's the year of 2015, let's conclude on the predictions this book made. The book

essentially made two big prediction: 1. Mega trend of Apple 2. Biotech Subsequently, the author called for NAS to 5000. Enough said, you would have made a fortune by now even after this month's Biotech and Apple sell off. So tell me, why did you guys give one star? 12 of 17 people found the following review helpful. Much shy of a six pack By Jimmy Rogers The Alpha Hunter principle is a sound one, buy leaps on geographical or industrial bets and prosper thru 10:1 leverage as the trends play out. The book Alpha Hunter lays out these exciting times for opportunity however falls far short on examples of profits made by the author or specific future plays. I'd be willing to sell my used book at half the purchase price. Disappointed -- 8 of 10 people found the following review helpful. Totally misleading By vah The book title is totally misleading - it doesn't deal with LEAP options, besides just revealing that such options exist. The book is really a kind of attempt on 'motivational speaking' targeted for investors, but I didn't find it very inspiring.

Discover how elite investors bring in triple-digit returns! With *The Alpha Hunter*, readers will learn how to manage the "four winds" of the stock market: bubbles, currency, economic contraction, and economic growth. Blending technical skill with a deep understanding of the fundamentals, the author provides what readers need to achieve risk-adjusted returns that earn higher than benchmark (alpha), as well as successfully invest in long-term equity anticipation securities (LEAPS). Using the information here, readers will learn how to use option LEAPS as both a stock alternative and a means of diversification.

About the Author Jason Schwarz is the options strategist for Lone Peak Asset Management (LPAM), a registered investment advisory firm located in Westlake Village, CA. Specializing in option LEAPS, he played a key role in helping LPAM's clients manage their way through the 2008 downturn. His articles have appeared on the Web sites Seeking Alpha, Yahoo! Finance, Stock House, and Mac Daily News, and his expertise has earned him multiple appearances on the Fox Business News Network and Business News Network in Canada.
