From WSPC : The Analysis of Competition Policy and Sectoral Regulation (World Scientific-Now Publishers Series in Business) before purchasing it in order to gage whether or not it would be worth my time, and all praised The Analysis of Competition Policy and Sectoral Regulation (World Scientific-Now Publishers Series in Business):

This volume contains a selection of papers that were presented at the CRESSE Conferences held in Chania, Crete, from July 6th to 8th, 2012, and in Corfu from July 5th to 7th, 2013. The chapters address current policy issues in competition and regulation. The book contains contributions at the frontier of competition economics and regulation and provides perspectives on recent research findings in the field. Written by experts in their respective fields, the book brings together current thinking on market forces at play in imperfectly competitive industries, how firms use anti-competitive practices to their advantage and how competition policy and regulation can address market failures. It provides an in-depth analysis of various ongoing debates and offers fresh insights in terms of conceptual understanding, empirical findings and policy implications. The book contributes to our understanding of imperfectly competitive markets, anti-competitive practices and competition policy and regulation. Readership: Young researchers and doctoral students looking for new avenues and possibilities for future research; researchers looking for up-to-date treatment of a number of key competition issues; general public practitioners interested in analyzing competition policy.
