Carol J Ellick, Joe E Watkins : **The Anthropology Graduate's Guide: From Student to a Career** before purchasing it in order to gage whether or not it would be worth my time, and all praised The Anthropology Graduate's Guide: From Student to a Career:

0 of 0 people found the following review helpful. Five Stars
By Jose M. great read! good price! One of the toughest transitions is going from student into a career type setting and I think this book does a great job putting you in a position to get a full time career. It explains in detail the type of things you need to be thinking about as you are about to graduate with an anthropology degree. It also shows the various types of fields that you can enter having an anthropology degree. I would recommend buying this book!

By Mathew This was a required reading in my anthropology class for good reason. It's short, useful, and detailed. If you're looking to find a career or enter graduate school, this book tells you exactly what you need to do and what jobs are available to you given your level of experience and education. Highly recommended!

By Customer This book can greatly benefit you but only if you use it! Putting the time into this book will give you good results in preparing to graduate and move into the work force or graduate school.

Mom will ask, "What can you do with a degree in anthropology?" If you want the answer, then you need this book. Applied anthropologists Carol Ellick and Joe Watkins present a set of practical steps that will assist you through the transition from your career as a student into a career in a wide range of professions that an anthropology degree can be used. The stories, scenarios, and activities presented in this book are intended to assist you in learning how to plan for the next five years, write your letter of introduction, construct your resume, and best present the knowledge, skills, and abilities learned in class to prospective employers. Ellick and Watkins' step-by-step approach helps you create a portfolio that you will use time and time again as you build your career.

"Wide-ranging in its scope — the authors try to provide information and helpful hints on everything that could confront you as you go from being a student to being a professional, from ethics, to what level of degree you want/need, to how to write cover letters. But it's rooted in three practical tools — keeping a journal, a portfolio, and making a 5-year plan. It comes across as a cross between self-help workshops and a very useful pep talk about how to tailor your skills, knowledge and abilities to the fields of anthropology. It helps translate job announcements and your own background into skills and abilities tailored with anthropology in mind. The writing style is very easy to read, informal, and engaging — as though a close mentor or "uncle" were giving you advice. It will be very useful for the growing number of graduate programs that are trying to link their students and graduates with employment. A step-by-step guide without being overly prescriptive." - Shirley J. Fiske, University of Maryland and anthropological consultant
