the view that you never see on the news. This is about the real people and what is going on in their lives. No matter their politics, newspeople study the trees of events. This is about watching trends, long term trends, demographics. That is the forest. Plus lots of great data on many social topics. The Middle East may not be what you think. We also need a new perspective on these same topics for Mexico and Latin America. Mahajan did this before, for Africa. 0 of 0 people found the following review helpful.
