My wife had this book recommended to her and after reading it recommended it to me. As I was reading it, I kept thinking that it reminded me of another book I had read called "the

Energy Bus."(in a good) Sure enough, it was the same author. This is a great book and an easy read in that it is a great narrative that literally begs you to keep turning pages (digital they may be....Kindle Version.) I love it when I feel good after reading a book, and this book made me feel motivated and driven to not only have success, but do it for the right reasons and in the right way. I can truly say you will not be disappointed with this book. I recommend it for both people in business as well as anyone reading it for personal reasons. Read when you need a lift, and you will become a "builder" or something even better. 2 of 2 people found the following review helpful. Thought Provoking By Customer I ended up taking a few pages of personal notes from this book. Great reminder for all of us that life is about serving out of love and keeping our lives full of the good. Speak positively to your self instead of listening to self imposed negative thoughts. 3 of 3 people found the following review helpful. Wise counsel for all humans By Customer The Carpenter's message is timeless, poignant and enduring. It's simple, love-serve-care lesson, is as basic as it gets, but when you come right down to it, that's really all there is to a 'flourishing life'. This book is for anyone at any stage of their life or career and I highly recommend it. Some might say it's too simple or 'Pollyannaish', but, my response to them is, 'you are very likely too smart for your own good, so believe that at your own peril'. Again, excellent, quick read for all.
